

Grant agreement no:

608571

Project acronym:

SUCCESS

Project full title:

Industrial steam generation with 100% carbon capture and insignificant efficiency penalty - scale-up of oxygen carrier for chemical-looping combustion using Environmentally sustainable materials

Collaborative project

Theme:

FP7 – ENERGY.2013.5.1.1

Deliverable D9.1

Set up of project web page

Due delivery date: 2013-10-31

Actual delivery date: 2014-01-07

Lead beneficiary:

Partner no. 1 - Vienna University of Technology (Vienna)

Dissemination level:

Public (PU)

Vienna University of Technology

DELIVERABLE 9.1

Set up of project web page

SUCCESS - Industrial steam generation with 100% carbon capture and insignificant efficiency penalty - scale-up of oxygen carrier for chemical-looping combustion using Environmentally sustainable materials

Keywords: Web page

Work package: 9 – Dissemination

Involved partners: Vienna

Dissemination level: Public (PU)

Objective

To set up a project web page containing information about the project objectives and the major results.

Reason for delay:

In order to save costs, it has been decided to use the internal hosting service of Vienna University of Technology. The delay was caused by unexpected problems with the used content management system Typo3, which has been used for the first time by people involved in the project.

Introduction

Project web page

A project web page has been set up presenting the objectives of the project as well as the major results. The URL of the web site is:

<http://www.clc-success.eu>

The web page is hosted on servers of Vienna University of Technology using Typo3 as content management system. Thus, easy and fast updates by numerous users with their own user account are possible.

Document sharing and management (restricted area)

Whereas public documents like deliverables with dissemination level public (PU) and publications will be available for download on the web page itself, the main document exchange during the project will be done via a Microsoft Share Point Portal only accessible by project members.
